

## **Rob Field Guideline (Synthetic Turf)**

We need your help in maintaining this new field so we can all enjoy quality use in the years to come. Due to the nature of the field there are certain activities and actions that can seriously damage the field. Field repairs are not only costly they also close down the field thus affecting other user groups. Therefore, we ask you to enthusiastically adhere to the following guidelines.

- No Smoking or any other tobacco products allowed on the field
- Absolutely no gum chewing
- No food or drinks on the field (water is allowed)
- No pets or animals allowed on the field
- No Vehicles (golf carts are prohibited too)
- No bicycles (please keep them outside of the fence)
- Please only use chairs that have rounded legs (harp or pointed legs damage the surface)
- Table/platform legs need to be on a hard surface such as plywood.
- Please do a trash pick-up after you use the field

Everyone can benefit if we all help to keep this field in excellent condition. In the event someone spills a liquid other than water, please dilute the area of the spill with water. In addition please inform the Rec Cen staff of the location of the spill. Also please report any damages, concerns or misconduct to the Rec Cen staff. Thank you in advance for your cooperation.
